

DUAL RS-232 DRIVER/RECEIVER WITH IEC61000-4-2 PROTECTION

Check for Samples: [MAX232E](#)

FEATURES

- Meets or Exceeds TIA/RS-232-F and ITU Recommendation V.28
- Operates From a Single 5-V Power Supply With 1.0- μ F Charge-Pump Capacitors
- Operates up to 250 kbit/s
- Two Drivers and Two Receivers
- ± 30 -V Input Levels
- Low Supply Current . . . 8 mA Typical
- ESD Protection for RS-232 Bus Pins
 - ± 15 -kV Human-Body Model (HBM)
 - ± 8 -kV IEC61000-4-2, Contact Discharge
 - ± 15 -kV IEC61000-4-2, Air-Gap Discharge

D, DW, N, NS, OR PW PACKAGE
(TOP VIEW)

APPLICATIONS

- TIA/RS-232-F
- Battery-Powered Systems
- Terminals
- Modems
- Computers

DESCRIPTION/ORDERING INFORMATION

The MAX232E is a dual driver/receiver that includes a capacitive voltage generator to supply TIA/RS-232-F voltage levels from a single 5-V supply. Each receiver converts TIA/RS-232-F inputs to 5-V TTL/CMOS levels. This receiver has a typical threshold of 1.3 V, a typical hysteresis of 0.5 V, and can accept ± 30 -V inputs. Each driver converts TTL/CMOS input levels into TIA/RS-232-F levels. The driver, receiver, and voltage-generator functions are available as cells in the Texas Instruments LinASIC™ library.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Table 1. ORDERING INFORMATION⁽¹⁾

| T _A | PACKAGE ⁽²⁾ | | ORDERABLE PART NUMBER | TOP-SIDE MARKING |
|----------------|------------------------|--------------|-----------------------|------------------|
| 0°C to 70°C | PDIP – N | Tube of 25 | MAX232ECN | MAX232ECN |
| | SOIC – D | Tube of 40 | MAX232ECD | MAX232EC |

LOGIC DIAGRAM (POSITIVE LOGIC)

Absolute Maximum Ratings⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

| | | | MIN | MAX | UNIT |
|------------------|--|------------|-----------------------|-----------------------|------|
| V _{CC} | Input supply voltage range ⁽²⁾ | | –0.3 | 6 | V |
| V _{S+} | Positive output supply voltage range | | V _{CC} – 0.3 | 15 | V |
| V _{S–} | Negative output supply voltage range | | –0.3 | –15 | V |
| V _I | Input voltage range | Driver | –0.3 | V _{CC} + 0.3 | V |
| | | Receiver | | ±30 | |
| V _O | Output voltage range | DOUT | V _{S–} – 0.3 | V _{S+} + 0.3 | V |
| | | ROUT | –0.3 | V _{CC} + 0.3 | |
| | Short-circuit duration | DOUT | | Unlimited | |
| θ _{JA} | Package thermal impedance ^{(3) (4)} | D package | | 73 | °C/W |
| | | DW package | | 57 | |
| | | N package | | 67 | |
| | | PW package | | 108 | |
| T _J | Operating virtual junction temperature | | | 150 | °C |
| T _{stg} | Storage temperature range | | –65 | 150 | °C |

- (1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltages are with respect to network GND.
- (3) Maximum power dissipation is a function of T_J(max), θ_{JA}, and T_A. The maximum allowable power dissipation at any allowable ambient temperature is P_D = (T_J(max) – T_A)/θ_{JA}. Operating at the absolute maximum T_J of 150°C can affect reliability.
- (4) The package thermal impedance is calculated in accordance with JESD 51-7.

Recommended Operating Conditions

| | | | MIN | NOM | MAX | UNIT |
|-----------------|---------------------------------------|----------|-----|-----|-----|------|
| V _{CC} | Supply voltage | | 4.5 | 5 | 5.5 | V |
| V _{IH} | High-level input voltage (DIN1, DIN2) | | 2 | | | V |
| V _{IL} | Low-level input voltage (DIN1, DIN2) | | | | 0.8 | V |
| | Receiver input voltage (RIN1, RIN2) | | | | ±30 | V |
| T _A | Operating free-air temperature | MAX232EC | 0 | | 70 | °C |
| | | MAX232EI | –40 | | 85 | |

Electrical Characteristics⁽¹⁾

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted) (see [Figure 4](#))

| PARAMETER | TEST CONDITIONS | MIN | TYP ⁽²⁾ | MAX | UNIT |
|--------------------------------|--|-----|--------------------|-----|------|
| I _{CC} Supply current | V _{CC} = 5.5 V, All outputs open, T _A = 25°C | | 8 | 10 | mA |

- (1) Test conditions are C1–C4 = 1 μF at V_{CC} = 5 V ± 0.5 V.
- (2) All typical values are at V_{CC} = 5 V and T_A = 25°C.

DRIVER SECTION

Electrical Characteristics⁽¹⁾

over recommended ranges of supply voltage and operating free-air temperature range

| PARAMETER | | | TEST CONDITIONS | MIN | TYP ⁽²⁾ | MAX | UNIT |
|------------------------|---|------|--|-----|--------------------|-----|------|
| V _{OH} | High-level output voltage | DOUT | R _L = 3 kΩ to GND | 5 | 7 | | V |
| V _{OL} | Low-level output voltage ⁽³⁾ | DOUT | R _L = 3 kΩ to GND | | –7 | –5 | V |
| r _o | Output resistance | DOUT | V _{S+} = V _{S–} = 0, V _O = ±2 V | 300 | | | Ω |
| I _{OS} (4) | Short-circuit output current | DOUT | V _{CC} = 5.5 V, V _O = 0 | | ±10 | | mA |
| I _{IS} | Short-circuit input current | DIN | V _I = 0 | | | 200 | μA |

(1) Test conditions are C1–C4 = 1 μF at V_{CC} = 5 V ± 0.5 V.

(2) All typical values are at V_{CC} = 5 V and T_A = 25°C.

(3) The algebraic convention, in which the least-positive (most negative) value is designated minimum, is used in this data sheet for logic voltage levels only.

(4) Not more than one output should be shorted at a time.

Switching Characteristics⁽¹⁾

V_{CC} = 5 V, T_A = 25°C (see Note 4)

| PARAMETER | | TEST CONDITIONS | MIN | TYP | MAX | UNIT |
|-----------|------------------------------------|---|-----|-----|-----|--------|
| SR | Driver slew rate | R _L = 3 kΩ to 7 kΩ, See Figure 2 | | | 30 | V/μs |
| SR(t) | Driver transition region slew rate | See Figure 3 | | 3 | | V/μs |
| | Data rate | One DOUT switching | | 250 | | kbit/s |

(1) Test conditions are C1–C4 = 1 μF at V_{CC} = 5 V ± 0.5 V.

ESD protection

| PARAMETER | TEST CONDITIONS | TYP | UNIT |

| r _i | Receiver input resistance | RIN | V _{CC} = 5 V, T _A = 25°C | 3 | 5 | 7 | kΩ |

(1) Test conditions are C1–C4 = 1 μF at V_{CC} = 5 V ± 0.5 V.

(2) All typical values are at V_{CC} = 5 V and T_A = 25°C.

(3) The algebraic convention, in which the least-positive (most negative) value is designated minimum, is used in this data sheet for logic voltage levels only.

Switching Characteristics⁽¹⁾

V_{CC} = 5 V, T_A = 25°C (see [Figure 1](#))

| PARAMETER | | TYP | UNIT |
|---------------------|--|-----|------|
| t _{PLH(R)} | Receiver propagation delay time, low- to high-level output | 500 | ns |
| t _{PHL(R)} | Receiver propagation delay time, high- to low-level output | 500 | ns |

(1) Test conditions are C1–C4 = 1 μF at V_{CC} = 5 V ± 0.5 V.

PARAMETER MEASUREMENT INFORMATION

- A. The pulse generator has the following characteristics: $Z_O = 50\ \Omega$, duty cycle $\leq 50\%$.
- B. C_L includes probe and jig capacitance.
- C. All diodes are 1N3064 or equivalent.

Figure 1. Receiver Test Circuit and Waveforms for t_{PHL} and t_{PLH} Measurements

PARAMETER MEASUREMENT INFORMATION (continued)

- A. The pulse generator has the following characteristics: $Z_O = 50\text{ }\Omega$, duty cycle $\leq 50\%$.
- B. C_L includes probe and jig capacitance.

Figure 2. Driver Test Circuit and Waveforms for t_{PHL} and t_{PLH} Measurements (5- μs Input)

- A. The pulse generator has the following characteristics: $Z_O = 50\text{ }\Omega$, duty cycle $\leq 50\%$.

Figure 3. Test Circuit and Waveforms for t_{THL} and t_{TLH} Measurements (20- μs Input)

APPLICATION INFORMATION

[†] C3 can be connected to V_{CC} or GND.

- Resistor values shown are nominal.
- Nonpolarized ceramic capacitors are acceptable. If polarized tantalum or electrolytic capacitors are used, they should be connected as shown. In addition to the 1- μF capacitors shown, the MAX232E can operate with 0.1- μF capacitors.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

⁽⁴⁾ Only one of markings shown within the brackets will appear on the physical device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
